

QUALITY, ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY POLICY

AZUD group success has always been based on its capacity for innovation in products, processes and management on the basis of a close collaboration and communication with customers, suppliers and other related parties.

AZUD's main objective is to meet the customer's needs and expectations within its commercial activity:

- Design and production of micro irrigation systems.
- Design, assembly and production of filters and filtration systems for irrigation and industry water treatment.

To achieve this goal, **AZUD** opt for an integrated Quality, Environmental and Occupational Health and Safety System (hereafter **SICMA and SST** by its initials in Spanish), meeting the requirements of **ISO 9001**; **ISO 14001** and **ISO 45001** standards.

AZUD, in pursuit of its objectives and concerned with the environment, its employees, its surrounding society and other related parties, raises **SICMA and SST** policy on the following principles:

- Innovation and Ongoing Improvement on its products, processes, services and management: Total Quality; control and reduction of Environmental Impact, Occupational Health and Safety (**SST**); risk and opportunities management.
- Resource optimization: Human (leadership, responsibilities, functions, roles and competences); Material and Services (supplier selection); Management (entities and technologies).
- Provide safe and healthy working conditions: Leaning on **SST Committee; HR Department, Prevention Service and SICMA and SST delegates**.
- Damage and health impairment prevention: Identifying and minimizing hazards and risks, looking for healthy environments and zero accidents, promoting this culture to interested parties outside of **AZUD**.
- Accountability: Comply with legal, regulatory and contractual requirements with related parties.
- Awareness: Training and information of those parties related to **AZUD** activity.
- Consultation and Participation: Our **SICMA and SST** system enables and facilitates different channels to promote the participation of employee and other Interested Parties
- Environmental protection: Through resource efficiency and sustainability and pollution prevention, identifying and controlling all environmental risk and aspects that derives from its activity, promoting this philosophy outside the organization.

With these principles, **AZUD** aims to clarify for Customers, Suppliers and other related parties the added value of its engagements in terms of Product, Service and Management Quality; Environmental Awareness and Occupational Health and Safety (SST).

AZUD request the involvement of all staff and partners, inasmuch as they are concerned, to apply this policy, developed in the documents forming **SICMA and SST**.
