

AZUD TUB

Microirrigation pipes: microtubes and commands.

What is it?

Application

Advantages

AZUD micropipes are divided among the different models and main applications of the same.

- It can be buried together with the distribution pipes to remotely operate the hydraulic valves.
- It is used as hydraulic command in the filtration equipment and the hydraulic irrigation installations.
- It is used in hydroponic thanks to its flexibility and its thickness.
- It is used for the insertion of drippers and microirrigation fittings.
- Manufactured with first quality raw materials.
- Eases the maintenance and the future enlargement of the installation.
- Reinforced packaging: easy transport and storage. Stackable.
- The insertion of drippers and fittings is easy and flexible.

Type	Diameter mm	Application	Colour	Coil	Code
PE	6.5x4.5 mm*	Drippers	Black	1300 m	01061N00
POLIFLEX	6.5x4.5 mm*	Drippers	Black	1300 m	01E60001
FLEX	5x3.3 mm*	Drippers	Black	800 m	01P20001
FLEX	6x4 mm	Drippers	Black	1500 m	01P60000
FLEX	5.3x3.3 mm*	Hydroponic	Black	700 m	01P10001
FLEX	6.5x4 mm*	Hydroponic	Black	-	01P6Cxxx
PE	8x5.6 mm	Hydraulic command	Violet band	800 m	0108N60L
PE	8x5.6 mm	Hydraulic command	Black	800 m	0108N600
PE	8x6 mm	Hydraulic command	Black	800 m	0108N610
FLEX	7x4.3 mm*	Microsprinkling	Black	1100 m	36RB1100

* Available micropipes also cut with lengths from 0.5 to 7m.

Note: Ask AZUD for different lengths in the cut of micropipes.
