

# AZUD PREMIER HCNL

More precision for your crop.

- 1 Protection H.E.X**  
Exclusive triple 3D filtration system.
- 2 Uniformity SILITEC**  
Pharmaceutical technology on the dripper's heart, the membrane.
- 3 Durability ELIPSIS**  
The best ally to the emitter's heart.
- 4 Anti-clogging DS TECHNOLOGY**  
The patented security.
- 5 Anti-Roots PIR**  
Experience against the root intrusion.

**DS**Technology  
Anti-clogging efficiency  
Eficacia antiobturante

## What it is

AZUD PREMIER is the greatest precision dripline on the market, that complies with ISO 9261 specifications, that guarantees the uniform crop growth under any type of terrain, using fewer resource and totally respectful with the environment.

Its non-drain technology presents itself as the best solution for the pulse irrigation or steep fields, as it holds the water under pressure ready for the following irrigation event.

## Applications

- Pulse irrigation.
- Uneven and steep terrains.
- Irrigation of ecologic production crops.
- Irrigation of high-value crops.

## Advantages

- **Drippers always protected:**  
Self-cleaning H.E.X. filtration system, for a surface and in-depth solid particles retention.
- **Greatest performance & lifespan in your system:**  
The ELIPSIS chamber is a specific housing where the membrane is placed, in order to guarantee its maximum performance.
- **Uniform discharge rate guaranteed along the crop lifecycle:**  
The elliptical-shaped injected membrane is free-of-movement and dynamic, which guarantees a precision, reliable and durable pressure-compensated operation.
- **Maximum strength against clogging, certified:**  
The self-cleaning labyrinth DS Technology is made up by elliptical cavities that prevent solid particles deposits.
- **Higher protection against root intrusion:**  
The PIR system consist on a combination of both experience physical protections that hinder the root intrusion.

\*Slope: 0%  
 \*Inlet pressure 3 bar / 44 psi.  
 \*Minimum pressure in the last dripper of the lateral: 1.5 bar / 21.8 psi  
 It is recommended to design the installation with lateral lengths shorter than 800 meters / 2.625 feet.  
 For other lateral lengths please, check AZIS, our software of hydraulic calculation in www.azud.com.
